

TALEXstrip P105–108

RoHS

**Applications:**

- safety lighting, general lighting, effect lighting and shelf lighting
- accenting lines and edges and for side injection
- edge lighting of transparent or diffuse materials
- suitable for use with TALEXprofile Z200/201/202/203

Highlights:

- maximum possible beam angle for uniform illumination (thanks to COB technology)
- low profile

Properties:

- high-power LED in COB technology
- dimmable by pulse width modulation (PWM)
- colour temperature white: ④
 - warm white (WW): 3,000 K
 - neutral white (NW): 4,200 K
 - daylight white (DL): 6,500 K
- integrated current source to stabilise luminous flux
- broad 140° light distribution for uniform illumination
- pre-mounted thermal conductive adhesive tape
- connection method: cable 200 mm
- identification of polarity: + red / – black

Notes:

- cooling required ③
- applying reversed polarity of the supply voltage may damage the TALEXstrip
- none of the components of the TALEXstrip (substrate, LED, electronic components etc.) may be exposed to tensile or compressive stresses
- for further information on installation please refer to the brochure entitled "TALEX installation instructions"

TALEX

all data for ta = 25 °C

① Tolerance range for optical and electrical data: ±15 %

② Exceeding the maximum operating voltage leads to an overload on the TALEXstrip.

This may in turn result in a significant reduction in lifetime or even destruction of the TALEXstrip.

Tolerance range for the supply voltage: 24V: +2V/-0V

③ If the maximum temperature limits are exceeded, the life of the module will be greatly reduced or the module may be damaged.

The temperature of the TALEXstrip at the tc point in the thermally stable state by means of a temperature sensor or temperature-sensitive sticker (available for example from www.conrad.com, www.rs-components.com) as per EN60598-1.

For the precise position of the tc point see the above diagram.

④ For colour temperatures and tolerances – see page 2

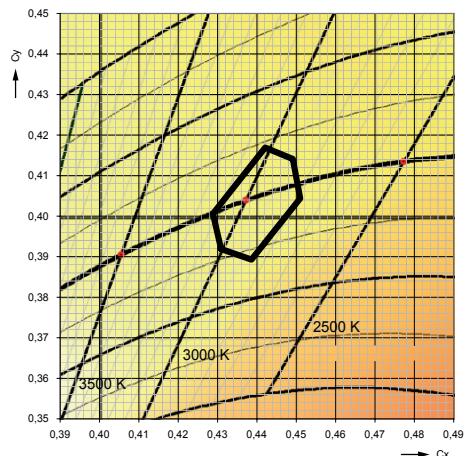

Recommended cooling area in cm² ③**Values for aluminium > 1 mm thick, tc = 80 °C**

type	ta 35 °C	ta 50 °C
P105	19.2	48.0
P106	38.4	96.0
P107	57.6	144.0
P108	76.8	192.0

It has to be observed that tc max. value is not exceeded within the specific application.
